PROJECTS

- **Travel Plan Creator using Generative AI** [--Github](#)
 - This project uses Streamlit to create an interactive web application for generating travel itineraries.
 - It integrates via the 'google.generativeai' library to generate detailed itineraries based on user-provided inputs such as the destination city, trip duration, and daily schedule preferences.
 - The utilization of generative AI, namely Google's PaLM2 API, seeks to transform the way we organize.
 - **Hotel Reservation Status Using Random Forest** [--Github](#)
 - This project uses a Random Forest Classifier to predict hotel booking cancellations based on guest details and booking characteristics.
 - It preprocesses data, trains the model, offers a Gradio interface for users to input booking information.
 - Then receive instant cancellation predictions, demonstrating practical application of machine learning in hotel management.
